Pronouns in Ndogoic

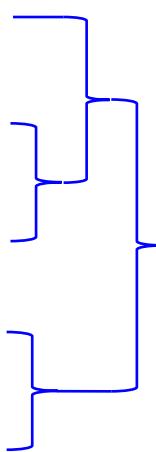

Structure

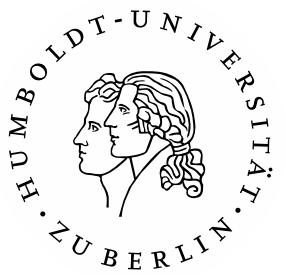

1. Profile: Ndogoic
2. Personal pronouns as comparative concept
3. Personal pronouns in Ndogoic
4. Reconstruction of the proto-Ndogoic personal pronoun paradigm
5. Logophorics & Demonstratives

Ndogoic Languages

- red: Ndogo
- blue: Sere
- violet: Tagbu
- yellow: Viri
- green: Bai

Ndogoic typologically

- Syllable structure CV or V; lexical roots probably only (C)V and (C)V (r/l) V
- 5 vowels in Ndogo ATR-contrast and vowel harmony in Viri and maybe Sere,
- three tone levels, lexical and grammatical
- canonical word order: S-V-O
- very little morphology

Classification

- Ndogoic language family, subdivided in Bai-Viri and Ndogo-Sere-Tagbu since Santandrea 1934
- NDOGOIC as a label for an geographical pool of languages including Ndogoic among others (Güldemann 2018)

Corpus

- Ndogo: 4 stories 2198 Tokens
- Sere: 2 stories + survey sentences 1571 Tokens
- Viri: 2 stories + survey sentences 1640 Tokens
- most of the stories only have a problematic glossing/translation

(1) *jopo ta boro de bi utoni ta ndere wei wila mina*
devouring of dog altogether by Hyena for reason true not merely
(Viri: Tucker nd:315)

Person deixis as comparative concept

- speaker and addressee are universally referred to in some way
- 3rd person is only negatively defined as -SP, -AD -> often closer ties to spatial deixis and anaphora (Bhat 2013)
- A 1 + 2 person (+ SP, + AD) is not uncommon cross-linguistically (Cysouw 2003:85-90)

pronouns as stable concepts

— „They do not provide labels for unique referents [...]; they are not associated particularly with certain activity domains, as for instance higher numerals may be; they do not involve any manipulation of the presupposition domain or management of the interaction roles, and do not have the ‘clash’ potential at the interaction level between speaker intentions and hearer expectations; pronouns may be borrowable in principle. But in practice, in deictic and anaphoric function they show very low borrowability due to the absence of any of the functional features that tend to motivate borrowing.“

Matras (2020:224)

Person-deictic elements in Ndogoic

- occur in place of nouns, in all environments but as possessee
- as personal pronouns in S-position, O-position, with *ta* „with“ and *ji* „to“
- as possessive clitics in possession of N, with all other prepositions

(2) *ní tí- èrè kú ñgbó*

■ „neuter“-Pronouns

Subject:

a (Ndogo, Bai), *a-yi* (Viri), *ke* (Tagbu), *no/nda* (Sere)

Object:

ø/i (Ndogo, Tagbu, Viri, Bai), *ø/no* (Sere)

Santandrea (1961:52)

Pronominal Gender

(11) *kutuku ma á tiri a bu-lo ka wu i no j-o. a niki*
hyena QUOT oh spider ID father-2S.POSS there, just bestow thing DEM.PROX to-2S ID good
The hyena said: „Oh Tiri, it was your father, who bestowed this to you. It is good.“ (Tucker nd: 306)

■ *a* = ID (used in cleft- or passive-like constructions)

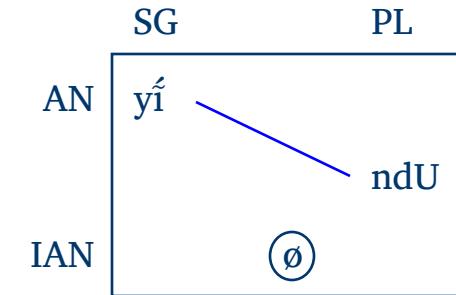

i = „thing“

no = DEM.PROX

Pronominal Gender

- (12) *ka ye zò la ná wo má duru wo gi wele*
but 1S eat NEG CONJ.EMPH 2S if want 2S come take/give
[Tiri said: „fried for me were only these burnt beans, that are in this old bag.“
but I have not eaten (them), hey, if you want, you can take some“ (Tucker nd: 298)

zero-pronoun for referents low on the nominal hierarchy

Logophoric pronouns

- surprisingly regular across the languages:

LOG.SG (n)i = 3S + low tone
LOG.PL nda(n)i = PL + 3S

- (13) *yí gí ve ndú ma ndai ya ta ndu ba nju ñgo la we*
3S come ask 3PL QUOT 3PL.LOG go with 3PL INF drink water NEG QM
“He asked them, if they would not go (together) with him to drink water” (Ndogo:Tucker nd:301)

- Viri does not have logophoric pronouns. Loss through contact with Boor?

Logophoric pronouns

■ the same forms also used as possessives

- (14) *tiri gi visi co j-i ma yi do bá mì na mí*
spider come turn word to-3S QUOT 3S.LOG from house of sister of-3S.POSS.LOG
“Tiri answered to him, that he was from the house of his (Tiri’s) sister.” (Ndogo: Tucker nd:298)

Demonstrative pronouns

■ Formula:

base	+	demonstrative clitic <i>-nV/-zo</i>
nd.: <i>ŋi-</i>	+	<i>-no</i>
se./tg.: <i>ŋe-</i>	+	<i>-ne/i</i>
vi./ba. <i>ŋa-</i>	+	<i>-no/u</i>

- (15) *ŋi-nɔ a ŋi-nde ka ŋi-zɔ a ŋi-ndɔ*
PRN-PROX ID PRN-linker:1S.POSS but PRN-DIST ID PRN-linker:3S.POSS
“This is mine, but that is his.” (Ndogo: Tucker nd:100)

Conclusion

- Singular logophoric pronouns reconstructible as 3S + V̄
Plural log. pr. as PL + [3S + V̄] younger than singular, but older than replacement of plural marker in Viri
 $(3S\text{-split (Ndogo vs others)} \Rightarrow)3S + V̄ \Rightarrow PL + [3S + V̄]$
- Demonstrative pronoun go back to a construction N-DEM or N-(PREP)-POSS
